KAWAGUCHIKO
PLEASURE BOAT: APPARE

Lake Kawaguchi is a lake located at an altitude of 839m above sea level. It is 110m higher than Lake Ashinoko in Hakone. It has a depth of 25m, which is the deepest among the five lakes. There is a width of 20 km around the lake. While cruising along the middle of Lake Kawaguchi, visitors can see the reflection of Mount Fuji reflecting off the water surface. There are various types of fish in the lake, such as koi, blackcurrant fish, etc. And most importantly, it is also the lake that has the most tourists coming to visit throughout every season, both foreign and Japanese tourists.

Mt. Fuji Panorama Ropeway is only 1 minute away. Get off the ropeway and walk towards the Lake.

富岳風穴 WIND CAVE

<https://www.mtfuji-cave.com/panorama2/main.html>

★ Fugaku Wind Cave ★

The cave is surrounded by nature and the Aokigahara forest. The average temperature inside the cave is 0-3 degrees. And it will be cold even in the summer, like going into the refrigerator. It has been chosen as a natural monument of Japan. It is a tunnel-shaped wind cave formed by the flow of lava that erupted from a volcano. Inside the cave, there are ice pillars that never melt in mid-summer and large lava rocks. Natural ice can be seen during the winter and early fall.

WIND CAVE Route map

The cave has an entrance diameter of 5.4m, and extends a total length of 201m. The ceiling is 5.4m high at a point 43m from the entrance, and 8.7m at its highest point in the cave.

鳴沢氷穴 ICE CAVE

<https://www.mtfuji-cave.com/panorama2/main.html>

★ Narusawa Ice Cave ★

It is a cave with icicles and stalactites that have frozen together inside the cave along with beautiful illumination. The cave is located to the east of Aokigahara Forest at the foot of Mount Fuji. The cave was formed by a volcanic eruption 1150 years ago. In addition, the oldness of the cave also tells the story of the past where people once lived. There are various ancient objects left to be seen until today which indicates the way of life of people in this area very well.

The passages inside this lava cave are 153 meters long and 21 meters below the ground. There are ice pillars throughout the year. The cave walkway is in the shape of a ring, so you can walk around and enjoy the cave's appearance.

A natural source of ice that has been transferred to Tokyo since the Edo period.
